DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 43-44 are rejected under 35 U.S.C. 102(e) as being anticipated by Emons et al. (USP 6,671,681).

3. With regard to claims 43-44, Emons et al. discloses for handling packet data having a plurality of data segments comprising [abstract]: parsing the packet data [col. 6, lines 63-64]; initializing a search based on the parsing of the packet data [col. 6, lines 64-65]; and outputting

search results based on a searching procedure performed on the packet data and the parsing of the packet data [col. 6, lines 66-67].

Allowable Subject Matter

4. Claims 1-42 are allowed.

5. The following is a statement of reasons for the indication of allowable subject matter:

The Examiner has not a method for handling multiple data segments between a first and a second node which (1) obtains a first parse state based on a first data segment of multiple data segments, (2) obtains a first search state based on the first data segment associated with obtaining the first parse state; (3) obtains a second parse state based on (a) a second data segment of the multiple data segments and (b) the first parse state; (4) obtains a second search state that is based on (a) the second data segment, and (b) the first search state that is associated with obtaining the second parse state; (5) obtains a third parse state based on (a) a third data segment of the multiple data segments and (b) the second parse state; and (6) outputs the search results based on the second search state that is associated with obtaining the third parse state.

6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
